Top quality through and through

Whether a new building or renovation – window sills must always satisfy high physical requirements. Window sills from WERZALIT are manufactured according to a patented process as high-pressure moulded parts. They are resistant to construction moisture, dimensionally stable and long-lasting. WERZALIT window sills stand for quality in all respects.

Your key benefits at a glance:

- ✓ Large selection of shapes, decors and dimensions
- ✓ High-quality, long-lasting
- ✓ Dimensionally stable
- ✓ UV-resistant
- ✓ Resistant to construction moisture
- ✓ Food-safe
- ✓ Easy to clean
- ✓ No health risks
- ✓ Environmentally friendly
- ✓ PEFC-certified
- ✓ 25 year warranty

A view with style

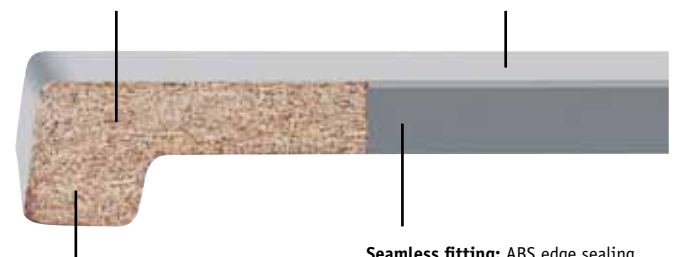

In interior design, selecting the right window sill is a matter of aesthetics. Whether you are looking for an unobtrusive room element or a pronounced accent, WERZALIT offers you a wide selection of shapes, decors and dimensions. On offer are the window sill types exclusiv with classic shaped edge, compact in a sleek, modern design and expona with right-angled, ABS-coated front edge plus the system window sills exclusiv-drop-nose and compact-drop-nose with extended front section.

Quality based on experience

WERZALIT window sills are made of PEFC-certified wood and high-quality resins. WERZALIT has over 50 years of experience in the production and use of compression-moulded parts. The products benefit from this experience thanks to the careful selection of raw materials and the advanced production process.

Resistant to construction moisture and dimensionally stable: Highly compressed, homogeneous material core

Robust and UV-resistant: Multi-layer melamine resin coating, permanently melted onto the material core

No peeling: Integrated shaped edge, pressed as a single piece

Seamless fitting: ABS edge sealing in furniture quality can be applied at the factory

Extra service from WERZALIT:
Factory finishing in fixed lengths,
ready for installation;
here: exclusiv window sill,
colour: 021 metallic

Stylish and always fresh – exclusive window sills offer a broad palette of refined stone and warm wood decors. A simple touch in the form of an elegant window sill can significantly enhance the look of a room, whether classic or modern, reserved or character-defining. The proven shaped edge is a hallmark of WERZALIT quality.

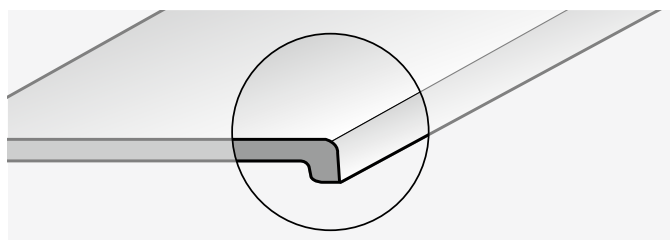

exclusiv window sill,
colour: 001 white

exclusiv indoor window sill. Classic, beautiful

exclusiv is the classic series with typical, integrated shaped edge. It is available as a basic window sill or intelligent system window sill. Various colours, decors and three different surface types leave room for realising individual interior design ideas.

exclusiv indoor window sill

The 34 mm thick moulded edge lends the high-quality exclusiv indoor window sill a classic appearance. Robust, dimensionally stable and easy to care for, the material properties of these window sills make them perfect for private as well as public buildings.

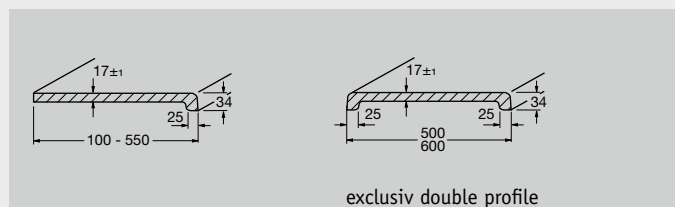

exclusiv-drop-nose system window sill

The exclusive-drop-nose system window sill with drop-nose is perfect for fitting out new buildings or as an easy-to-install solution for renovating window sills in need of repair. The drop-nose makes it ideal for installing overtop existing window sills. It can also be equipped with integrated radiator panelling or installation and cable channels.

Accessories

Detailed installation instructions and additional information about accessories and technical data can be found at www.werzalit.com

*Standard lengths: 3000, 4250, 6000 mm **Standard length: 6000 mm

The refined compact window sill with its pronounced bevel sets modern interior design accents. Choose your personal favourite from the Emotion colour range!
Colour: 420 dark grey

The compact window sill with its sleek, slim line creates a clear but unimposing ambiance that goes well with the pure colours and decors. Both neutral and bold tones are available in the colour and decor range. compact is a window sill that lends windows a unique style.

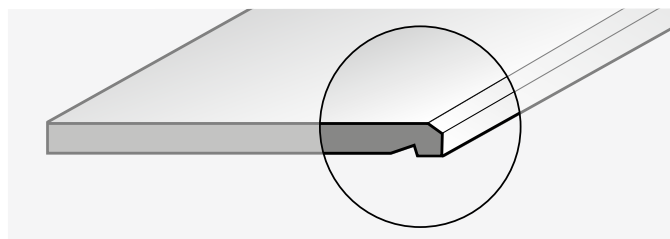

compact window sill,
decor: 311 carrara

compact indoor window sill. Straight, modern

The compact series is available as a refined basic window sill and as an intelligent system window sill. It adds atmosphere to modern architecture and accentuates living and working spaces with soft pastels.

compact indoor window sill

compact indoor window sills have a contemporary, straight look with a pronounced bevel on the front edge and a sleek profile. Their material properties make them suitable for use in both private and public areas. A flush wall termination is also possible.

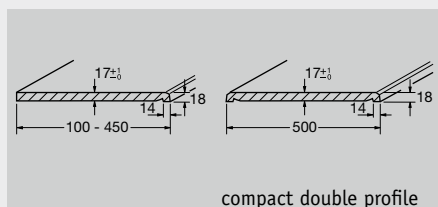

compact-drop-nose system window sill

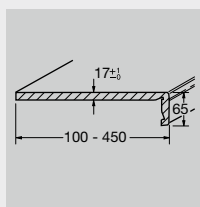

In commercial construction and renovation, the compact-drop-nose system window sill enables perfect and uncomplicated solutions. With the drop-nose, it can be installed directly over-top existing window sills in need of renovation, eliminating the need to knock out the walls. The window sill can also be equipped with radiator panelling or installation and cable channels.

* Standard length: 4250 mm

expona window sill,
surface: 001 white;
front edge: 021 metallic

A window sill that invites you to lean on it and gaze out the window. The flawless surface creates a cheerful mood and calls out for decoration. In form and function, the expona window sill is a perfect example of purist, modern interior design. Even with all its right angles, it incites designers to play with colours, decors and surfaces.

expona window sill,

colours and decors of the ABS front and side
edges (from top to bottom): 327 red,
338 blue, 103 wenge, 416 multiplex

expona indoor window sill. The indoor window sill with a clear design

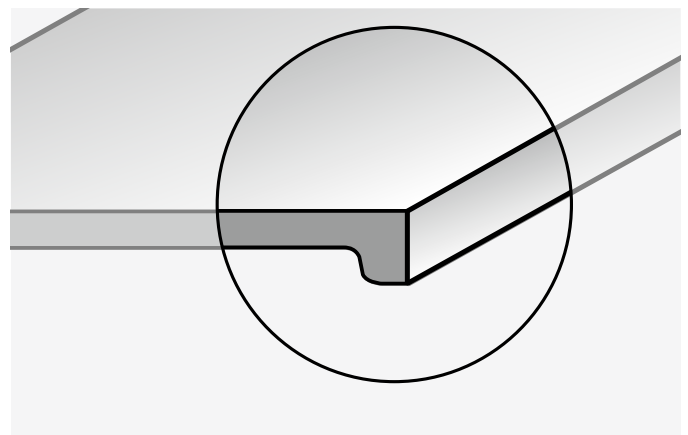

The expona indoor window sill expands the WERZALIT window sill product range to include a straight-lined modern design. Naturally, expona is delivered in original WERZALIT quality.

New edge – new look

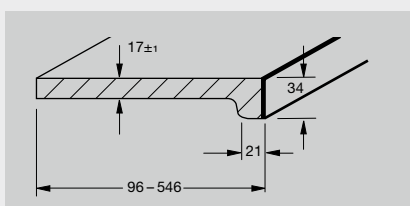

Thanks to its sleek and elegant appearance, expona has everything it takes to become a modern classic. The straight front edge with ABS edge coating in furniture quality is available with the same decor as the surface, with contrasting decors or in a multiplex look.

Individual custom manufacturing

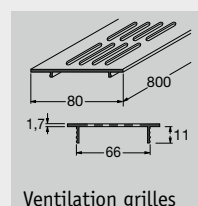

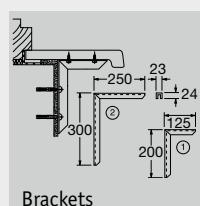

You can have expona custom made to meet your needs. We coat the front and side edges for you at the factory and also cut the window sills to the required width and length. With their wide variety of dimensions, expona can be used for very wide and deep window fronts.

* Standard length: 6000 mm

Custom processing

Profit from the unique WERZALIT window sill processing service for the series exclusiv, compact and expona. We satisfy individual processing wishes, whether cutting to length or edge coating with the highest manufacturing precision. This saves you both labour and money. And the quality is perfect down to the finest detail.

Your key benefits at a glance:

- ✓ Ready-to-install delivery
- ✓ No material waste
- ✓ No risk of faulty cuts
- ✓ ABS edge sealing in furniture quality
- ✓ No laborious manual edge coating
- ✓ Precise execution in our CNC processing centre

Cutting to measure

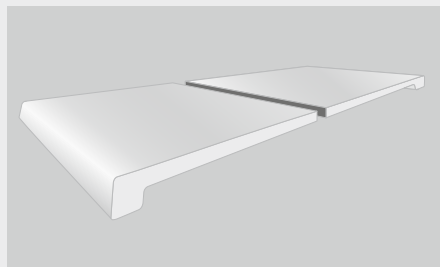

If desired, WERZALIT can deliver fully cut window sills, including with notching or milled-out sections, if required. In contrast to materials sold by the metre, you only pay for what you really need – without worthless scrap. You save a great deal of work and need not fear faulty cuts.

Edge sealing in furniture quality

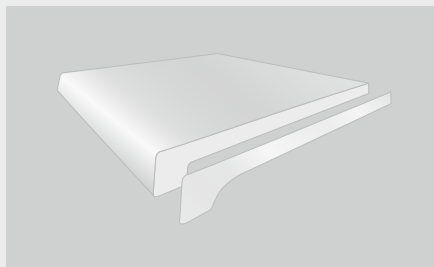

WERZALIT is the only manufacturer to offer sealing of open cut edges for the window sill types exclusiv, compact and expona. For exclusiv and compact, this ABS edge coating is matched to the ordered window sill decor, while for expona, it can be chosen freely. A seamless fitting in furniture quality is guaranteed. Compared with the effort and result of manually affixing the edge sealing, the small surcharge is always worthwhile.

Factory processing
